

Don't deny it; you've always wondered what it would be like to be able to control the temperature of your entire home with the ease of one central control, kind of like the great and powerful Oz. With Trane's new [ComfortLink II](#), you're dreams are about to become a reality.

Many of [Georgetown Development's](#) DC clients, when designing their custom home are looking for an all-inclusive thermostat that allows them to control the home with one touch, and that's one of the reasons that we love this new system from Trane. Not only is it super easy to install, but it also features a troubleshooting menu and a large 7-inch screen that's almost 100% customizable.

Want to learn more about how a system like this fits into your custom home design or next whole house renovation project? Visit us at www.georgetowndevelopment.com to view some of our award winning homes.

Happy Building!
