Every home wants that wow factor. Whether it's a custom built out kitchen or a bathroom with all the amenities of a spa; we're all looking for that product and at [Georgetown Development](#) in Washington, DC, it's our job to help you find it.

While many homes today are a little more modest than they were a few years ago, that doesn't mean that you can't splurge on the details. We think that the Bio-Luminum 100% recycled aluminum tiles from [Coverings Etc.](#) are a great way to bring sophistication to any kitchen backsplash or accent wall. They are made from high-quality alloy from old airplanes and are available in 6- and 12-inches. They add the perfect amount of shine and elegance to any wall and if you are looking to add a green element to your home, it doesn't get any greener than using 100% recycled materials.

To learn more about how we can help you in the DC metro area with your custom home or room to room renovation, please visit us at [www.georgetowndevcorp.com](http://www.georgetowndevcorp.com) where you can check out some of our award winning green homes.

Happy Building!
